DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 07/12/2010 has been entered.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim(s) 18-26 is/are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter as follows. Claim 18 is drawn to functional descriptive material recorded on a computer software product. Normally, the claim would be statutory. However, the specification, at page 16-17 defines the claimed computer readable medium as encompassing statutory media such as a "ROM", "hard drive", "optical drive", etc, as well as ***non-statutory*** subject matter such as a "signal", carrier wave, and airwaves.

A "signal" embodying functional descriptive material is neither a process nor a product (i.e., a tangible "thing") and therefore does not fall within one of the four statutory classes of § 101. Rather, "signal" is a form of energy, in the absence of any physical structure or tangible material.

Because the full scope of the claim as properly read in light of the disclosure encompasses non-statutory subject matter, the claim as a whole is non-statutory. The examiner suggests amending the claim to include the disclosed ***non-transitory*** tangible computer readable media, while at the same

time excluding the intangible media such as signals, carrier waves, airwaves, etc.

Any amendment to the claim should be commensurate with its corresponding disclosure. **Since the amended claims do not commensurate with the specifications the rejection under 35 U.S.C. 101 is maintained.**

Allowable Subject Matter

3. Claims 1, 2, 4-17, and 30-32 are allowed. The following is an examiner's statement of reasons for allowance: The prior art fails to teach obtaining all four of the following characteristics for the first tuner in the cable modem: downstream power monitoring characteristics, band crossover frequency, tuner control bytes, and upstream power reporting characteristics. The prior art also fails to teach that the plurality of tuners are components of the said cable modem.
